America's Dangerous Turn Left

America is in critical decline:

Many Americans are deeply concerned. The radical left has gained control of the nation. A blind man can easily see that this new Democratic Party is not the party of Truman or Kennedy. Its leading personalities promote policies that are weakening the nation spiritually, economically, socially, morally, militarily, and politically. How did this happen? Today, most Americans fail to consider Socialism, Social Justice, Marxism, Antifa, Black Lives Matter, Critical Race Theory, Wok, Canceled Culture and Communism to a threat to the foundations upon which this nation was founded.

A Little Leaven:

The apostle Paul stated, "A little leaven leaveneth the whole lump" (Gal. 5:9). The social or political integration of any one of the above could prove fatal to a healthy America, how much more so a weaker America. This sinister worldview behind the social justice movement and Critical Race Theory (CRT) is not only being taught to children in most public schools, but has already infiltrated most seminaries, pulpits, VBS programs, Sunday school literature, and the evangelical church in particular. In 2020 as riots rocked America cities, Christians begin to preach from pulpits that racial and social justice is a gospel also. What they are duped into preaching are "damnable heresies" (2 Peter 2:1), that actually opposed the Kingdom of God.

Beware of Social Justice:

The term "**Social Justice**" is now commonly used by leftist activists, judges, pastors, educators and politicians to describe the goal they seek to achieve with many of their policies. In short, "**Social Justice**" is **COMMUNISM**." It is historically rooted in the Marxist philosophy that the money people make and the property they own do not rightfully belong to the people who make the money or own the property. Karl Marx's ultimate criticism of capitalism is its "recognition of private property". The reason **private property is so evil**, Marx contended, is that it is a function of "economic class warfare." In other words, "the rich" use the concept of private property to oppress "the poor." Money is really a "collective product" that belongs to everyone. Marx saw man only in social context, meaning not as an individual, but as part of a class. Thus the word "social" (in social justice) refers to classes in society.

Social Justice shows its ugly head:

- In the 150 days sentence of Jussie Smollett for staging a phony “hate crime” in Chicago having never to admit his guilt. He will serve 70 days to the great consternation of Jesse Jackson and Al Sharpton.
- The lenient sentences for repeat violent offenders, including sex offenders.
- In labeling “hate crimes” for those who ask voters for identification.
- After entering the United States illegally, millions of immigrants are protected by some 550 “Sanctuary Cities” jurisdictions throughout the nation.
- The refusal to allow federal immigration officials to deport illegal immigrants or illegal lawbreakers.
- Social Justice showed its ugly head when buffoonish one day rioters on January 6, raided the capital building and the leftist and their accomplice in the media continues to make it worse than the felons who for 120 days loot, burn, attack court-houses and police precincts, cause more than 30 deaths, injure 2,000 policemen, and destroyed at least \$2 billion in property – all under the friendly banner of “Social Justice.”
- The Biden administration has allowed 2 million foreign nationals to enter the United States illegally across the southern border – in hope that they will soon become loyal “Social Justice” leftist.
- The Biden administration has “no plans” to allow Keystone XL pipeline to resume its operations despite saying “all options are on the table.” Both Democrats and Republicans have criticized the president for holding Americans captives to foreign oil. When Mr. Biden took office America was fuel efficient. Americans are experiencing the highest prices since the 2008 financial crisis, with the national price average soon to reach \$5 per gallon. The Social Justice boys demands that the environment must take precedent over whatever the cost per gallon.

■ Identity Politics:

Social Justice has resurfaced to mean something altogether different than it did 100 years ago. Today, **identity politics** has been redefined by the Social Justice boys to mean that one is defended by race, gender and sexual orientation rather than merit. If historically there have been no minorities, gays, women, lesbians, transgenders, queers, or bisexuals, appointed to a particular position.
